

STA 2122 REVIEW II – Chapters 4-6 (not all-inclusive)

- True/False
 - The standard deviation of the sampling distribution of the sample mean is always equal to the standard deviation of the population.
 - The number of defective vending machines on a college campus is an example of a continuous random variable.
 - Every normal distribution has a mean = 0 and standard deviation = 1.
 - A binomial random variable is a discrete random variable.
- Which of the following is a valid probability distribution?
 - | | |
|-----|--------|
| x | $p(x)$ |
| 0 | .30 |
| 1 | .20 |
| 2 | .40 |
 - | | |
|-----|--------|
| x | $p(x)$ |
| -3 | .35 |
| 0 | .65 |
| 3 | -.10 |
 - | | |
|-----|--------|
| x | $p(x)$ |
| 0 | .36 |
| 3 | .52 |
| 6 | .22 |
 - | | |
|-----|--------|
| x | $p(x)$ |
| -8 | .24 |
| -4 | .65 |
| 0 | .11 |
- Suppose in a recent national election, 40% of the voters were men. If a random sample of 25 voters was selected, what is the probability that more than 10 but less than 20 were women?
- A traffic study conducted at one point on an interstate highway shows that vehicle speeds are normally distributed with a mean speed of 63.5 miles per hour and a standard deviation of 4.8 mph.
 - If a vehicle is randomly selected, what is the probability that its speed is between 55 and 65 mph?
 - 60% of the speeds in the distribution exceed what value?
- Find the mean and variance of the following probability distribution:

x	-9	1	4
$p(x)$.3	.4	.3

KEY (brief answers provided; show all work on the exam)

- F, F, F, T
- d
- .937
- a) .5833 b) 62.3 mph
- a) -1.1 b) 28.29
