

## **Tutoring positions available:**

The mathematics department will be hiring mathematics tutors for the spring semester. If you are interested in the position and meet the qualifications described below, please submit the application described below to Susan Gorman ([gorman@fiu.edu](mailto:gorman@fiu.edu)) before December 29th. We will make hiring decisions the following week.

### **Qualifications:**

A math tutor must have received grades of B or better in Calculus III and Differential Equations (MAP 2302). Preference will be given to applicants who (1) are students in the mathematics department, (2) have tutoring experience, (3) have received good grades in mathematics coursework, or (4) have good recommendations. We are also very interested in tutors who, in addition to the requirements described above, also are familiar with Social Choice Mathematics (MGF 1107) or Business Calculus with graphing calculators. There is funding to pay for tutors to learn these courses.

### **Responsibilities:**

Math tutors work in GL 120 helping FIU students with questions about their math courses. Tutors must show up on time for their assigned hours. Failure to keep assigned hours may result in termination.

### **Pay:**

The pay is \$10/hour for tutors without undergraduate degrees and \$15/hour for tutors with bachelor degrees.

### **Application:**

To apply for a tutoring position, submit a resume including a description of relevant coursework and experience to Susan Gorman ([gorman@fiu.edu](mailto:gorman@fiu.edu)). It is not necessary to submit recommendation letters but you may include the contact information for someone who is willing to describe your qualifications. Please note that including such a recommendation is optional.

Finally, please let us know what hours you would be available to work if you were hired and if you are interested or willing to work on the North Campus.
